Figure 1

Figure 1 shows a schematic diagram of the experimental setup. A subject is seated at a table, viewing a video screen. A camera is positioned above the screen, and a light source is positioned to the left. The subject is viewing a video screen that displays a target (a small circle) and a starting point (a small square). The subject is instructed to move a hand from the starting point to the target. The video screen is divided into two regions: a starting region and a target region. The starting region is defined by a small square, and the target region is defined by a small circle. The subject is instructed to move the hand from the starting point to the target. The video screen is divided into two regions: a starting region and a target region. The starting region is defined by a small square, and the target region is defined by a small circle. The subject is instructed to move the hand from the starting point to the target. The video screen is divided into two regions: a starting region and a target region. The starting region is defined by a small square, and the target region is defined by a small circle.
